Registration, Evaluation, Authorisation and Restriction of Chemicals regulation EC 1907/2006 [REACH]

Within the scope of the above regulation, R. A. Labone & Co. Ltd. act as a **Downstream User** and **Supplier of an article** and as such are reliant on information being supplied to us by our supply chain. Our investigations have identified that there is no substance listed on the current Candidate List of 253 items for Authorisation exceeding the threshold of 0.1% w/w in the articles we supply.

The intent of REACH is to protect human health and the environment by better managing the risks and placing the responsibility for proof of safety on industry. R. A. Labone & Co. Ltd. supports the underlying goals of REACH, which are consistent with our own commitment to safety and the environment. In case of an extension of the candidate list in future, we will check immediately if our products are affected by that, to ensure that we continue to meet our obligations.

Chris Young
Managing Director
